

# DEFPOL

DEFPOL is an effective defoaming agent for all kinds of water-based drilling mud's. It is composed of: unsaturated lipid acids, pharmacological purity refined hydrocarbons, and non-ionic emulsifier.

## PROPERTIES :

Physical appearance:	bright olive liquid
Specific gravity:	880-920 kg/m <sup>3</sup>
Freezing temperature :	App. – 10°C
pH(1% solution):	7,0-8,0

## APPLICATION :

DEFPOL is used in all kind of water-based drilling mud's. Typical concentration range is from 0.05 to 0.1 %. In high viscosity mud's concentration up to 0.2 % is recommended.

DEFPOL is a non-flammable, non-explosive, non-toxic and health safe agent.

## PACKAGING :

DEFPOL is packed in 180 dm<sup>3</sup> polyethylene drums.

Polski Serwis Płynów Wiertniczych Sp. z o.o.
